

# Fuel Stabilizer

## Why Fuel Fit®?

Today's ethanol-blend fuels can damage engines by attracting moisture. Ethanol readily bonds with atmospheric moisture creating an ethanol-water mix, which is highly corrosive for engine parts. Fuel also begins to degrade almost as soon as you pump it. Gums and varnishes are formed that can stick valves and clog fuel lines and carburetor jets, resulting in severe starting problems, poor engine performance, overheating and fuel leakage.

Briggs & Stratton® Fuel Fit® additive is for use in all 4-stroke and 2-stroke engines. Fuel Fit® works to prevent this and provides an internal coating to protect engine parts. It contains detergents to avoid the build up of dirt, promoting durable, efficient performance and stabilizes fuel for up to 3 years to ensure easy starting.

Available in 100ml and 250ml sizes for dosing varying fuel quantities, with an instore CDU for impactful merchandising.

- ✔ **Cleans and protects from the inside**
- ✔ **Prolongs your engine's life**
- ✔ **Improves performance**
